1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
2. The title of the invention is not descriptive. A new title with 500 characters or less is required that is clearly indicative of the invention to which the claims are directed.
3. The abstract is not in compliance with 37 CFR 1.72(b) and MPEP §608.01(b). The abstract should be a single paragraph of 150 words or less commencing on a separate sheet following the claims.
4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
5. Claims 4 and 5 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.
6. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the pieces" in line 16.

There is insufficient antecedent basis for this limitation in the claim.

Regarding claims 1-3, the phrase "or like" renders the claims indefinite because the claims include elements not actually disclosed (those encompassed by "or like"), thereby rendering the scope of the claims unascertainable. See MPEP § 2173.05(d).

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 3662

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by JP10038997. The JP10038997 reference discloses the utilization of a polar to rectangular scan conversion (see figure 9) for a radar (see paragraph [0001]); pixel memory (see paragraph [0010]); sweep comparing means (see claim 1); and data shifting means (see paragraph [0008]).
